TRI-COUNTY AUTO SUPPLY COMPANY

TRI-COUNTY AUTO SUPPLY COMPANY – JUNE

BEAT THE SUMMER HEAT

June is here, and with it comes the start of the unbearable summer heat. While that may seem a bit overdramatic the truth is there will be fewer and fewer places to escape the heat as the days go by, and we feel your customers vehicles should always be a place they can go to cool off. As always, Tri County carries every chemical, tool, and piece of equipment you could ever need to maintain a car's A/C system. We stock the two most popular automotive freons on the market today, R1234YF and R134A. When you come to Tri County you can rest assured knowing you'll get the right freon for any job at an unbelievable price.

TCA also carries a full line of A/C leak-detecting dyes. Being able to recharge a customers' A/C system is one thing, but making sure there are no leaks in said system is another vital part of the process. We have multiple dyes that can be used with either freon mentioned above, as well as the injector tools needed to use them. These easy-to-use dyes have made the hassle of leak detection a breeze.

Once the freon has been recharged and no leaks have been detected, the next step in the A/C system service is to help boost its performance with the VP105-9150 kit. If you are unaware, TCA manufactures its own service kit using the Valvoline VP105 and FJC9150. The VP105 is specially formulated to clean mold and bacteria out of the A/C vents, odors they might create, while the FJC9150 has been proven to decrease the air temperature, help the system run more efficiently, and increase its lifespan. This kit, coupled with the leak detection tools and freon, create a potent combination of chemicals that bring an unprecedented level of protection to any A/C system.

Having all these chemicals so readily available is a huge benefit to any dealership, however they won't mean much if your A/C recharge/recycle machine isn't functioning properly. Luckily TCA's repair division stands at the ready to fulfill all your machine maintenance needs. With new machines becoming harder and harder to procure it's important to make sure the machines you have now are running properly to avoid any down time. Whether it's something as simple as replacing a filter, or in depth as recalibrating a scale, our skilled technician can handle anything way. Contact your sales representative today to learn more about how Tri County can become the one-stop-shop for all for A/C service needs.

properly to something as thrown his County can

3M ADHESIVE WHEEL WEIGHTS

Unfortunately, we have another casualty of the supply chain shortages. In recent weeks 3M has been hit with a shortage of some of the raw materials used to make their stick-on wheel weight rolls. Their main supplier of these materials is located in Eastern Europe, which has faced major disruptions due to the ongoing conflict between Russia and the Ukraine. At the moment 3M does not know when production of the wheel weights will resume regularly, so they will be unavailable until further notice. To combat this shortage, we are hard at work procuring the most comparable replacement options so all our customers can continue their operations as normal. We appreciate your patience and understanding while we navigate this unusual situation.

TCA HAPPENINGS

As always there's a million different things going on here at TCA this month and we'd like to take a minute to highlight some of the most exciting ones.

Another Addition to the TCA Family

We are thrilled to announce sales representative Lauren Finkelstein is expecting her third child! Please join us in congratulating her and wishing her good health during the remainder of her pregnancy (and congratulations to owner Gary Finkelstein on his sixth grandchild). After working here for nearly a decade we're confident being a mother to three children will be a cakewalk. Lauren will be going on maternity leave at the end of June, with the rest of the sales team covering her accounts while she is away. Sales rep Brenda Tarazona will also be taking over TCA social media accounts so you can expect the same great content you've become accustomed to.

Welcome Back

Tri County is also excited to announce the return of All American Ford as a Valvoline Professional Series chemical customer. We missed you while you were gone but are ecstatic you've decided to rejoin the team. We look forward to continue building our business relationship and fulfilling all your service chemical needs.

Happy Father's Day

On behalf of everyone here at Tri County, we'd like to wish all the fathers out there a happy Father's Day.
